

SURE FIT™ SERIES - 1968-1976 Corvette**GEN IV**

All new design specifically for '68-'76 Corvette models. New separate heater and cooling coils and high volume blower give you OEM quality comfort, provide infinite dash and floor blending, and retains the factory look inside your vehicle. Factory "wheel type" console controls are used. Sure Fit systems mount to existing holes in dash and firewall in most cases.

Complete kit includes: Evaporator, condenser, drier, compressor, compressor bracket, hose kit and hi/lo safety switch.

The Gen-IV All-In-One Kit For Your Stingray Corvette!

EVAPORATOR KIT: Air conditioning, heating and defrost combination designed specifically for your vehicle. Original a/c or non-a/c control assembly in your console connects to and controls this unit. Designed to mount to existing holes in your dash and firewall without drilling* or fabrication. Evaporator kit comes complete with all mounting brackets, hardware, louvers, duct hose, wiring harness and installation instructions.

COMPLETE KIT: All above plus condenser and drier package. Attaches to existing radiator mounting holes. No drilling* or fabrication required. Comes complete with condenser, mounting brackets, standard drier, pre-formed aluminum lines and mounting hardware.

NOTE: Some installations may require additional engine pulleys not included with kits. See page 64 for options. You must provide v-belts and refrigerant.

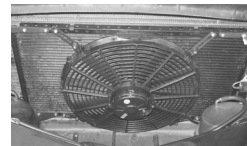

We recommend using a heavy duty fan blade and shroud see pages 74-75.

Mustangs and Fords seem to be growing in popularity. This '69 Mustang convertible was built by Comp Cams to demonstrate their great performance parts. To keep them cool and comfortable on the Power Tour, they built a complete Vintage Air SureFit Gen-IV system into the car and used our Streamline control panel for the finishing touch.
