

## CONTROL PANELS

### 4-Lever Standard Gen-II Fingertip Control

Only Gen-II delivers true OEM style louver air temperature regulation and bi-level operation\* of a/c and heat modes! This standard panel uses our exclusive servo actuated heater valve which allows the introduction of small amounts of heat to regulate air temperature. Simplified installation with plug-in connections, no vacuum lines, and fewer wires to route. Slightly larger face allows you to upgrade from existing vacuum system Proline Panel installations.

**49110-SHQ** 4 Lever Fingertip Panel  
4.63" wide x 2.44" tall. Internally lighted.

**49110-SVQ** 4 Lever vertical Fingertip Panel  
2.44" wide x 4.63" tall. Internally lighted.

Pro Panel 5.5" wide x 2.5" tall. Back lighted knobs.

**Knobs  
Are Back- Lit!  
Looks Cool!**

**NEW!**

## TOTALLY COOLED GALLERY

It seems all the top builders are into muscle cars now. When Bobby Alloway decides to do it you know it will be amazing! This '67 Fastback Mustang features a twin turbo 4.6 Cammer motor, Six speed trans, 14" Wilwood brakes and a full Art Morrison Max-G chassis. Like all Alloway cars, it's just as smooth and slick underneath as it is on top. Oh, it also has a full Vintage Air Gen-II climate control, natch!
