

Vintage Air Designed SuperFlow™ Micro Tube Condensers

This SuperFlow™ condenser design has once again demonstrated Vintage Air's commitment to leading edge technology and superior product quality. The importance of this unique new micro tube design and its improved refrigerant flow cannot be over emphasized. By providing increased refrigerant contact with the micro tube walls and multiple passes per circuit for low restriction pathway, the SuperFlow™ condenser provides up to 40% more capacity than a comparably sized tube and fin condenser.

03701-OVA condenser

03770-VUC unpainted condenser

Bottom Exit Hard Lines

- 35342-VUG # 6 line
- 35043-VUG # 8 line

INTERNATIONAL GEARHEAD SCENE

People all over the world are developing a passion for American cars. With television programs and magazines reaching the international gearhead scene, Vintage Air is becoming recognized globally for its unprecedented quality. Our own John Chisenhall has been handling much of our relations and sales in Latin America for the past few years and we expect big things from the Brazilian gearhead scene.
