Packing List: Control Panel Kit (473071)

No.	Qty.	Part No.	Description
1.	1	473070-FCA	Control Panel Assembly
2.	1	232007-VUR	Control Harness, Gen IV Universal

**** Before beginning installation, open all packages and check contents of shipment. Please report any shortages directly to Vintage Air within 15 days. After 15 days, Vintage Air will not be responsible for missing or damaged items.**

**NOTE: Images may not depict actual parts and quantities.
Refer to packing list for actual parts and quantities.**

OEM Control Panel Removal

Perform the Following:

1. Disconnect all wires, vacuum hoses, and control lever cables from the back of the OEM control panel (See Figure 1, below).
2. Remove the driver side under dash louver (See Figure 1, below).
3. Remove the control panel/lower dash assembly (See Figure 1, below).
4. Remove the control panel from the lower dash assembly (discard control panel) (retain lower dash panel) (See Figure 1, below).
5. Disconnect the control panel dash light. **NOTE: When using a Vintage Air supplied control panel, connect the tan wire from the Gen IV Evaporator wiring harness (232600-VUA) to the factory dash lights to enable panel backlighting.**

Figure 1

www.vintageair.com

Control Panel Installation

1. Install the new control panel assembly into the lower dash panel as shown in Figure 2, below.
2. Secure the control panel assembly to the dash using (3) #8 x 1/2" pan head screws as shown in Figure 2, below.

Figure 2

Control Harness

1. Plug the control panel wiring harness into the ECU as shown in the evaporator installation instructions. Plug the opposite end of the harness into the control panel PC board as shown in Figure 3, below.

NOTE: When using a Vintage Air supplied control panel, connect the tan wire from the Gen IV Evaporator wiring harness (232600-VUA) to the factory dash lights to enable panel backlighting.

PRE-WIRED

PROGRAM

N/A
* DASH LAMP (IF USED)
*** WIDE OPEN THROTTLE SWITCH (OPTIONAL)

** CIRCUIT BREAKER 30 AMP

COMPRESSION RELAY

BINARY OR TRINARY SAFETY SWITCH

CMPR

HEATER CONTROL VALVE

NOTE: = CHASSIS GROUND

* Dash Lamp Is Used Only With Type 232007-VUR Harness.

** Warning: Always Mount Circuit Breaker As Close to the Battery As Possible. (NOTE: Wire Between Battery and Circuit Breaker Is Unprotected and Should Be Carefully Routed to Avoid a Short Circuit).

*** Wide Open Throttle Switch Contacts Close Only at Full Throttle, Which Disables A/C Compressor.

Operation of Controls

On Gen IV systems with three lever/knob controls, the temperature control toggles between heat and A/C operations. To activate A/C, move the temperature lever/knob all the way to cold and then back it off to the desired vent temperature. For heat operation, move the temperature lever/knob all the way to hot and then adjust to the desired vent temperature. The blower will momentarily change speed, each time you toggle between operations, to indicate the change.

Blower Speed

This lever/knob controls blower speed, from OFF to HI.

Mode Control

This lever/knob controls the mode positions, from DASH to FLOOR to DEFROST, with a blend in between.

Temperature Control

This lever/knob controls the temperature, from HOT to COLD.

A/C Operation

Blower Speed

Adjust to desired speed.

Mode Control

Adjust to desired mode position (DASH position recommended).

Temperature Control

For A/C operation, adjust to coldest position to engage compressor (Adjust between HOT and COLD to reach desired temperature).

Heat Operation

Blower Speed

Adjust to desired speed.

Mode Control

Adjust to desired mode position (FLOOR position recommended).

Temperature Control

For maximum heating, adjust to hottest position (Adjust between HOT and COLD to reach desired temperature).

Defrost/De-fog Operation

Blower Speed

Adjust to desired speed.

Temperature Control

Adjust to desired temperature.

Mode Control

Adjust to DEFROST position for maximum defrost, or between FLOOR and DEFROST positions for a bi-level blend (Compressor is automatically engaged).
